

Name _____

Meter Stick Madness

1. Make a prediction. How many meters do you think it will take to get from the playground to your classroom door? How many meters do you think it take you to get from PE to your classroom door?

I think the distance from the slide to the class is _____m.

The distance from the slide to the class is _____m.

I think the distance from PE to class is _____m.

The distance from PE to the class is _____m.

2. Color in the two graphs comparing the distance between the playground and the classroom door (which represents A) and PE and the classroom door (represents B).
