0  1  2  3  4  5  6  7  8  9  10  11  12  13  14  15  16  17  18  19  20  21  22  3  24  25  26  27  28  29  30
```

Station Three: There are 57 kinds of bamboo at the San Diego Zoo. The pandas eat 12 kinds of bamboo. How many kind of bamboo don't the pandas eat?

Station Four: Hua Mei weighed 59 pounds at her first birthday. She weighed 199 pounds when she was three years old. How much weight did she gain in two years?

Station Five: Hua Mei weighed 15 pounds at four months old and 30 pounds at seven months old. How much weight did she gain in three months? Write an equation to solve this problem.

Subtraction Anchor Chart

More on top?
No need to stop! ---------->

Example One:

More on the floor?
Go next door..
And get 10 more! ---------->

Example Two:

Numbers the same?
Zero's the game!

Example Three:

Mei Sheng sleeps 16 hours a day. How many hours is she awake?
